Weekly eyewash check log

complyday.com

Office: Eyewash location: Type (plumbed, faucet-mounted or self-contained): Year:

Date	Ran until water was clear (plumbed) or fluid level and expiry OK (self-contained)	Flow reached both eyes	Caps on, nozzles clean	Path clear, sign visible	Water lukewarm	Initials	Problem found and fix

Mark each check Y or N. ANSI/ISEA Z358.1 calls for plumbed eyewashes to be activated weekly long enough to verify operation, self-contained units to be checked weekly, and all units to be inspected once a year. Follow the manufacturer's instructions. OSHA's rule is 29 CFR 1910.151(c).
